

Curre is a company dedicated to increasing the accessibility of fitness for all individuals.

Background

We have observed that there is an overwhelming amount of considerations to be made before the purchase of running shoes. Our goal with this endeavour is to improve the overall experience of newcomers to running while ensuring that they will be safe and healthy.

Pronation is the natural way your foot rolls inward when it strikes the ground and then propels forward.

You can determine this by examining the wear pattern on a well-used pair of running shoes.
